

PROSOLV ECO+ Degreaser

NEW GENERATION

NUCLEAR range – All metal treatment

RCC-M Tome V § F 6000 Compliance

RCC-MX Section II Tome 5 § XF 6000 Compliance

PRODUCT - DESCRIPTION

PROSOLV ECO+ is a degreaser that can be used on any metal: steel, stainless steel, copper, titanium, aluminum, etc. It can be used on any surface, part, equipment or installation.

Very concentrated product, it is effective even when diluted. It also has a mild deoxidizing action on steels.

Chlorine and sulfur free, it complies with nuclear requirements.

RESULTS AFTER TREATMENT

Thanks to its powerful formula, PROSOLV ECO+ deeply degreases all surfaces. It remains very effective, even when heavily diluted, and makes it possible to reduce pickling times

Non-aggressive, odorless, water-based, it does not emit VOCs. Environmentally friendly, it is 100% biodegradable according to the OECD 301A standard.

PRECAUTIONS OF USE

Dilute the product preferably at 10%, depending on the condition of the parts. The product can be used as a bath, as a spray, or as a sponge. Rinse after use.

The contact time is about 15 minutes in the bath: on very dirty or very oily surfaces, a mechanical action or a longer contact time may be necessary to obtain complete degreasing.

The product can also be used with high pressure washers, even at high temperature: add the product diluted to 10% in the product tank of the HP washer.

Rinsing should preferably be done using a high pressure cleaner.

The rinse water from the product can be sent to the sewer.

FEATURES & CHARACTERISTICS

Characteristics: colorless liquid.

Packaging: 20 kg can (disposable packaging).

Precautions for use: In case of contact with the eyes, rinse thoroughly. Refer to the information in the SDS.
